

RESTMOMENT ELECTRONIC CO., LTD

Professional conference system solution

RX 6640 system

--Fashionable Appearance & Channel Selector

Original all digital conference system

----- Original all digital conference system.

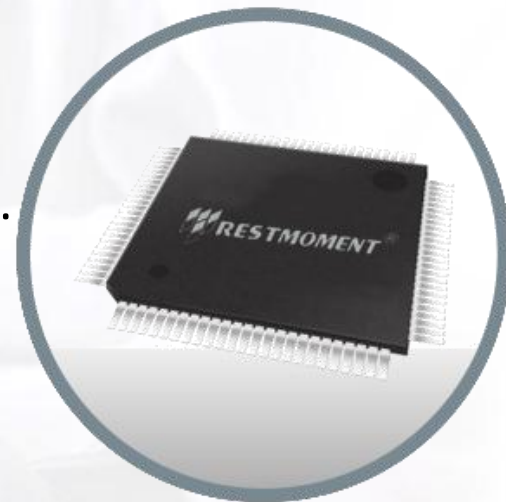

----- In line with international standards IEC60914.

----- 6 Pin cable, one cable could transmit 64 message.

----- Transfer rate up to 155Mbps. Remote transmission won't influence on sound quality.

----- The best long distance is 200M.

----- This series Adopt self-developed chips at the first time.

Automatic gain function+High-fidelity speakers

- Adopt High-fidelity class-D frequency (with Automatic gain function), High-fidelity speakers.
- In small meeting room, even no external speaker, this system could make you feel high quality sound.

Unique appearance and personalized functions design

New design concepts, to make our products more compact in size, more sophisticated materials and more sophisticated production processes, product is like a work of art. This unit with 4 CH simultaneous interpretation function. Concealed knob and headphone jack, mute switch.

Intelligent automatic protection technology

Depending on more than 10 years conference system experiment, Restmoment developed "intelligent automatic protection technologies". When system work, if happen some faults, such as processor damaged、 system fault、 desk fault, the controller or delegate unit could recognize the fault, and start protection function. Other units could go on work, don't interrupt conference.

Super anti-jamming function

New circuit design and optimization of shield points deployment, achieve more strong anti-jamming ability. Avoid mobile、 WIFI、 bluetooth、 radao、 MW Electromagnetic signals.

All digital conference controller

All digital conference controller is the system core. It with simultaneous interpretation、vote、video trace、MIC manage、intercom、message、audio record function. Controller could hold 8 speed done camera, support RS422\RS485\232 protocol, Built in 8*8 video matrix, 24 feedback inhibition, noise canceling function, Support 48KHz sample rate, transfer 20-20KH of perfect sound

Strict production and testing system

Restmoment have more than 10 years conference system experiment, and perfect quality management system. Use the most advanced production equipment, and through strict process control. Strict testing to ensure that products comply with the relevant technical requirements

Devotion makes profession

Thanks!
